

## ABSTRACT

The present invention concerns a ventilation device 100 comprising a fan 110 capable of being driven  
5 rotationally by an open electric motor 120 which is  
firmly attached to a support 130 intended for fixing  
said ventilation device 100, the fan 110 consisting of  
a plurality of blades 111 which are distributed  
regularly around a bowl 112 inside which there are  
10 arranged internal ribs 113 capable of ventilating said  
open electric motor 120.

The invention is remarkable in that the support  
130 comprises a central part 131 which is connected in  
a substantially sealed manner to at least one  
15 peripheral portion of the open electric motor 120.
